

PYTHON WINTER SPRINT 2026

Core Problem of 10th Jan 2026 : RPS Engine – Rock Paper Scissors

Today Only Foundation Track People Need to Work !!

FOUNDATION TRACK (FOR ABSOLUTE BEGINNERS AND NEW JOINERS)

[Expected Time to Finish – 1.5hrs]

Resource: <https://www.youtube.com/watch?v=UrsmFxEIp5k> from 3hrs 58 minutes till 4hrs 50 minutes

Core Topic: Loops

Problem Statement

Write a Python program that:

1. Asks the user for:
 - Student name
 - Number of subjects
2. Uses a loop to:
 - Take marks for each subject
 - Calculate total marks
3. After the loop:
 - Calculate average marks
4. Print a clean summary.

Sample Input:

```
Enter student name: Ayaan
Enter number of subjects: 3

Enter marks for subject 1: 70
Enter marks for subject 2: 80
Enter marks for subject 3: 90
```

Sample Output:

```
----- RESULT SUMMARY -----
Student Name : Ayaan
Total Marks  : 240
Average Marks: 80.0
```

Beginners Please ask in Group if you get to encounter any problem, any kind of problem in this, or just DM me
Every One was once a beginner !!
